Experience, Formalize, Practice

EXPERIENCE (BEGINNING OF CLASS)

- 1) Students work in teams of 3-4 to experience new content through a critical thinking problem
- 2) The teacher circulates the classroom to push groups forward and provide support

FORMALIZE (MIDDLE OF CLASS)

- 1) The teacher uses the whole experience of the activity to summarize the learning from the lesson as students complete notes & example problems

PRACTICE (END OF CLASS)

- 1) Example problems will be completed with their teams and as a whole class
- 2) Students will begin working on their homework assignment

Make Ups, Extensions, & Late Work

MAKE UPS

*If a student is absent for any reason, it is **their responsibility to visit me during my office hours** to make up a missed quiz or test.*

EXTENSIONS

*If a student feels like they need an extension on a homework assignment because of an absence or other reason, they need to **email/message me prior to the deadline**, and I will work with them to agree on an extension date.*

LATE WORK

*Any homework turned in after the deadline will be accepted up until the day of the unit test for a 50% penalty. **No credit will be given for homework turned in after the unit test.***

Recommended Calculators

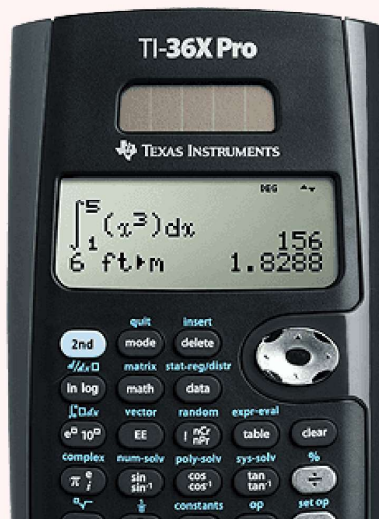

A majority of the quizzes and tests will allow the use of a scientific calculator (NOT graphing calculators). CCA has some calculators to use during class, but I highly recommend students having their own personal calculator to use:

RECOMMENDATION #1

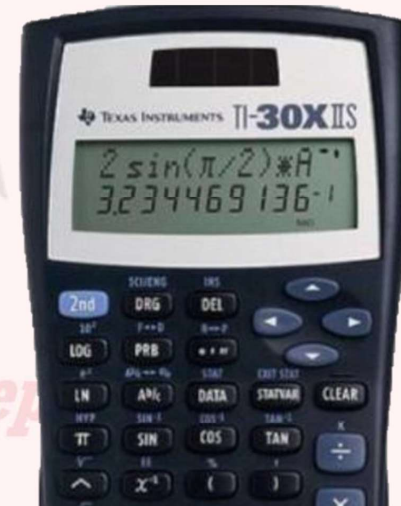

TI-36X Pro

RECOMMENDATION #2

TI-30XIIS

✓ PERMITTED
ON TESTING
SAT ACT AP
